By our shipping intelligence it will be seen that the storehouse Lexington has safely arrived, bringing \$370,000 worth of gold dust, to various parties in the United States. This is much the largest amount which has been received at any one time since the discovery of the mines, but will probably be exceeded by the amount which will be received from Charley by the Crescent City. Tangible evidence like this is what Wall-st. has wanted to set it thinking. A considerable portion of the gold on the Lexington belongs to our entrepeneur merchants.
